

**STATIC DIGITAL VOLTAGE REGULATION**  
highly efficient with exceptionally ultra fast speed of response – ideal for today's modern needs & those highly sensitive / mission critical loads and applications.

#### FEATURES

- **Automatic Voltage Regulation**  
Digitally controlled voltage stabilisation
- **Wide Range of Power Ratings**  
Single Phase 3 to 150 kVA
- **Choice of Input Voltage Swing Ranges**  
Input Swing -  $\pm 15\%$  (S15),  $\pm 20\%$  (S20),  $\pm 25\%$  (S25),  $\pm 30\%$  (S30),  $\pm 35\%$  (S35),  $\pm 40\%$  (S40),  $\pm 45\%$  (S45),  $\pm 50\%$  (S50) - customer to specify.
- **Precise Output Voltage Regulation**  
Output Voltage Accuracy  $\pm 1\%$  to  $\pm 5\%$  - depend on input Swing selected)
- **Transient Voltage Surge Suppression**  
TVSS - Protects loads against harmful high-energy surges, transients and spikes.

### ENSURING AN EXTREMELY STABLE AC MAINS SUPPLY VOLTAGE

Suitable for most types of electrical and electronic equipment, ESR Static Electronic AC Voltage Stabilisers continuously monitor the incoming supply. Should the incoming voltage rise or drop, the Stabilisers will automatically control the output to ensure the voltage reaching the load equipment always remains constant at the requisite voltage.

Inbuilt spike protection ensures the load is continuously protected against harmful mains born high energy spikes and surges.

#### ESR Series AC Voltage Stabilisers offer -

- **Ultra Fast Speed of Response**  
Compact in size and quiet in operation, ESR Series AC Voltage Stabilisers deliver an unsurpassable speed of response making them ideal for highly sensitive loads.
- **Static / Solid State Design**  
ESR Series AC Voltage Stabilisers use solid state devices (SCRs) to select transformer taps to regulate the output. Unlike other similar solutions, ESR Stabilisers by nature of their design do not require the SCRs to carry the full load, just a fraction - thereby delivering far superior reliability to similar systems found on the market. With no moving parts (other than cooling fans), they are virtually 'Maintenance Free' solutions.
- **Automatic Electronic Bypass**  
Inbuilt as standard on all models, the automatic bypass maintains power to the load and unit functionality, except regulation, in the event of a problem.
- **All Digital Controls**  
All digital microprocessor control and operation ensures ESR AC Voltage Stabilisers provide the highest level of performance and accuracy. The standard LCD display provides information on the operational status and loading on the stabilizer, and enables the configuration of a number system parameters for more demanding applications where customization is required.

- **Solid State Design**  
Electronic static design with no moving parts (other than cooling fans), delivering a virtually 'Maintenance Free' solution.
- **Inbuilt High Overload Capability** Ideal for loads with an inherent initial high current draw on start up.
- **Over / Low Voltage Protection** Ability to automatically shutdown the Voltage Stabiliser in the event of the input supply voltage going outside pre-set input voltage parameters.
- **SPD Class II Surge Arrestors** Protection against extremely high voltage surges and transients caused by atmospheric (eg. lightning induced strikes) or operational issues on the utility mains supply line.
- **Automatic Bypass Protection** Fully automatic transfer to bypass in the event of a problem.
- **Input & Output Protection with Manual Bypass** Input Breaker, Manual Bypass Switch and internal Output Isolation Switch, including mechanical interlocking to prevent inadvertent mis-operation of the Input & Bypass Breakers.
- **Digital LCD Monitoring Panel & RS/485 Interface** Displaying real time operational status, key system readings and alarm events with RS/485 Interface ability for remote monitoring.
- **Optional Accessories** Input Isolation, IP54 / NEMA 3 Style Outdoor Enclosures.
- **Compliance with International Standards** Designed, manufactured and supplied to comply with leading international standards.
- **CE Conformity** Fully compliant and labelled.

## DIGITAL BUCK BOOST SCR DESIGN TOPOLOGY

Based on the extremely well proven Buck Boost design topology which underlines our SES & SESE AC Voltage Stabilisers, ESR Static Voltage Regulators utilise SCRs (Silicon Controlled Rectifiers) to select transformer taps to deliver a highly stable output voltage with an extremely fast correction time.

Unlike traditional Electronic SCR based solutions, the underlying Buck Boost topology ensures that the SCRs are not required to handle the full load current, but merely a fraction of the load current. By suitably sizing the ratings of the SCRs, ESR Stabilisers are able to deliver impressive over-load capabilities and considerable enhanced reliability.

The utilisation of the latest in microprocessor control and the inclusion as standard on all models of an input circuit breaker, ensures that the SCRs are fully protected against over-current conditions and other malfunctions, which historically have been viewed as the primary weakness of Electronic based SCR solutions.

## VOLTAGE CHOICES AVAILABLE

### 2 WIRE SOLUTIONS SINGLE PHASE (L+N+G/E)

#### H SERIES 3 to 150 kVA

#### High Voltage Models:

220V, 230V or 240V

X567 Models - 254V, 265V or 277V

Other voltages available on individual request / quotation.

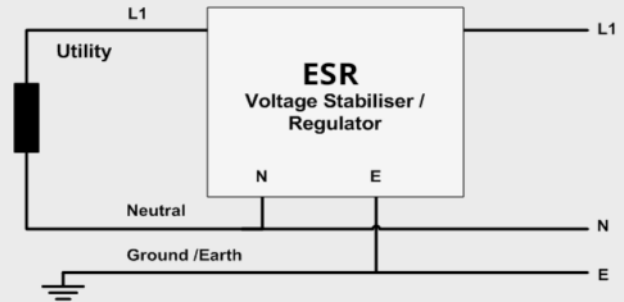

#### L SERIES 3 to 75 kVA

#### Low Voltage Models:

110V, 115V, 120V or 127V

Other voltages available on individual request / quotation.

## DESIGNED FOR TODAY'S MODERN NEEDS

Voltage Regulators are designed to stabilize the voltage when it fluctuates, up or down.

They are essential whenever reliable power is needed or when normal operation of electrical or electronic equipment is disrupted by voltage variations.

In general when suppliers of today's modern electrical and electronic equipment design their products they do so knowing that most electrical utilities around the world cannot provide or promise better than a  $\pm 5\%$  output voltage accuracy of nominal and as such they design their equipment so it is able to operate efficiently within this range.

ESR Stabilisers are specifically designed to meet the requirements of today's modern loads, being feature rich and virtually maintenance free static mains control solutions.

They ensure the availability of a constant voltage at a level that always meets the design requirements of the load equipment, even for the most challenging of power environments or site loads.

Electronic Virtually Maintenance Free

### Standard Features:

Input Breaker, Manual Bypass Switch and internal Output Isolation Switch. Along with LCD Digital Display, RS-485 interface, SPD Class II Surge Protection & Over / Under Voltage Protection.

### SOLID & ROBUST CONSTRUCTION

ESR Series Stabilisers are enclosed in robust floor standing air-cooled cubicles, being built upon a rigid framework construction and offering removable side panels and for ease of installation and servicing.

Supplied as standard with bottom cable entry (top entry to specific order), ESR Stabilisers offer IP20 / NEMA 3 Style Ingress Protection and are supplied complete with an epoxy powder heavy duty Oyster White (RAL 1013) orange peel paint finish.

Typical Internal View

### ALSO AVAILABLE IN IP54 / NEMA 3 STYLE ENCLOSURES

Suitable for external use, or more challenging internal environments.

### LCD DIGITAL DISPLAY PANEL

### Comprehensive LCD Digital Monitoring and Control Panel

delivering intuitive control and monitoring of all the key system parameters.

#### Real Time Display of -

- **Voltage:** Input & Output Voltages
- **Current:** Output Current
- **Operational Status:** On AVR & On Bypass
- **Alarm Conditions:** Overload, Over-Voltage, Under-Voltage & Fuse Failure

#### Modifiable System Parameter Settings -

- Output Voltage
- Output Voltage Accuracy
- Correction Time
- Voltage Regulation Method
- Over - Voltage
- Under - Voltage
- Over - Current Value

### RS-485 COMMUNICATION

All ESR Voltage Stabilisers offer as standard a RS-485 communication facility which will enable the following information to be available for remote monitoring -

#### Measurements:

- **Input Voltage:** Phase to Neutral
- **Output Voltage:** Phase to Neutral
- **Current:** Output Load Current

#### Status Indications:

- Over Voltage
- Under Voltage
- Current Overload
- Fuse Blown

## STANDARD ENCLOSURE TYPES

ALSO available in Outdoor IP54 / NEMA 3 Style Enclosures - **IP54 OPTION**

### B01 to B02 Enclosures

Physical Size:		Rear / Bottom Cable Entry
<b>B01</b>	280(W) x 300(H) x 530(D) mm	11.1"(W) x 11.9"(H) x 20.9"(D) inches
<b>B02</b>	350(W) x 400(H) x 600(D) mm	13.8"(W) x 15.8"(H) x 23.7"(D) inches

### B03 to B05 Enclosures

1 Side Door with removeable side panel

Physical Size:		Rear Bottom Cable Entry
<b>B03</b>	380(W) x 750(H) x 780(D) mm	15.0"(W) x 29.6"(H) x 30.8"(D) inches

Every Voltage Stabilization or Power Conditioning solution we offer is backed by the unrivalled experience we have gained in the world market over the last 25 years or so.

Tried, tested and extensively proven in all corners of the world, including some of the harshest and most remote power environments on this planet, our solutions can be found on duty protecting vital equipment where the supply must never be found wanting . . . not even for a single second.

Only by delivering Quality in product and service have we been able to consistently grow our client base year on year. Today we are an approved supplier to many well-known major international corporations and public organisations.

With an emphasis always on building and maintaining strategic and long-lasting relationships with our Customers, our Clients are drawn from a wide selection of industries and market sectors spread throughout the world.

### APPLICATIONS IN . . .

## CUSTOM BUILT SOLUTIONS

VSi, with a strong and wide manufacturing base, is able to meet the requirements of customers from our own in-house professional resources.

Where bespoke / custom built solutions are required we are able to call upon our extensive portfolio of proven standard designs and tailor offerings to accommodate, without breaking the bank, most individual specific requirements.
